PROJECTS:

• Cloning of NETFLIX website.

• Prediction model for eye transplantation using ML prediction control technique.

ACHEIIVEMENTS:

• By successfully resolving 850+ issues, I earned 495 bronze medals on the SkillRack coding platform.

• completed and received certification for 200 online courses on the Coursera platform.

• Earned a golden batch in Hacker-Rank profile by problem solving.

PROFILE: I'm an experienced Full Stack Developer with expertise in Python, JAVA, HTML&CSS and Data structures. I am passionate about software development and I'm excited about the opportunity to shape the electronics revolution with my skills

EXPERIENCE:

Flare Innovations – Web Developer Intern

Jan/2023 - Feb/2023

• Developed and maintained the company website using HTML& CSS and JavaScript resulting in a 25% increase in user engagement.

• Designed and implemented a scalable architecture for the website, resulting in a 20% increase in concurrent user capacity.

• Increased web traffic by 12% with all new modern design web development.

Deloitte – Software Engineer Intern

Aug/2023 – Aug/2023

• Build a dashboard to explore the client's telemetry data. Created an algorithm to unify 2 different data models.

• Prepared a Software Development Proposal. Identify the security issue which led to a leak of private company information.

JPMorgan Chase & Co – Software Engineer Intern

Aug/2023 – Aug/2023

• Aware of all sorts of agile ceremonies (user story grooming, sprint planning, sprint retrospective). Break the larger epics into smaller user stories.

• Groom user stories and make accurate estimates through story points.

Shiash Info Solutions PVT LTD – Full Stack Developer

Jun/2023 – Nov/2023

• Developed flow charts, layouts and documentation to identify 90% requirements and solutions. Write well designed and testable codes for software design

• Applied hands on learning and Machine learning to build and application. Created and debugged AngularJS, JavaScript, Typescript, Mongo, and NodeJS code.

CodeAlpha – Java Developer Intern

Oct/2023 – Present

• I have been tasked with implementing algorithms, building applications or contributing to existing codebases.

• Designing, Building and maintaining Java based applications and websites. Contribute to all stages of software development lifecycle.
